

AMENDMENTS TO THE CLAIMS

No amendments to the claims are being submitted in this paper. This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A method for biologically controlling a cryptogamic vine disease, comprising applying to a vine having said cryptogamic disease a mixture consisting essentially of at least one isolated bacterium and at least one isolated yeast and an inert vehicle, the each said bacterium ~~or bacteria~~ and the yeast ~~or yeasts~~ being non-toxic to the vine, and each said bacterium ~~or bacteria~~ ~~is/are~~ is from a genus selected from the group consisting of ~~the~~ *Bacillus*, *Pseudomonas*, *Serratia* and *Streptomyces* ~~genera~~, to treat said disease.

2. (Cancelled)

3. (Currently amended) The method according to claim 1, wherein ~~the~~ each said bacterium ~~or bacteria~~ ~~are~~ is selected from the group ~~comprising a~~ consisting of *Bacillus megaterium* species ~~and/or a~~ and *Bacillus subtilis* species.

4. (Currently amended) The method according to claim 1, wherein the each said yeast ~~or yeasts~~ ~~are~~ is from a genus selected from the group consisting of ~~the~~ *Debaryomyces* ~~genus~~ and *Pichia* ~~genus~~.

5-15. (Cancelled)

16. (Currently amended) The method of claim 1, wherein said at least one isolated bacterium comprises *Bacillus megaterium* (BP-B-04) strain (CNCM Deposit No. I-2897).

17. (Currently amended) The method of claim 1, wherein said at least one isolated bacterium comprises *Bacillus subtilis* (BP-B-10) (CNCM Deposit No. I-2940).

18. (Currently amended) The method of claim 1, wherein said at least one isolated yeast comprises *Debaryomyces* ~~(BP-Y-01)~~ (CNCM Deposit No. I-2896).

19. (Currently amended) The method of claim 1, wherein the yeast concentration of said mixture is about 0.5 to 0.75×10^{10} and bacterial concentration of said mixture is about 0.30 to 0.50×10^{10} per liter.

20. (Currently amended) The method of claim 1, wherein said cryptogamic vine disease is selected ~~from the group consisting of~~ powdery mildew, blue mould and or Botrytis.

21. (Currently amended) The method of claim 1, wherein said applying includes spraying said vine with said mixture having an approximately 50/50 ratio of ~~baeteria~~ said bacterium to said yeast.

22. (Currently amended) A method for biologically controlling a cryptogamic vine disease, comprising applying to a vine having said cryptogamic disease a mixture consisting essentially of at least one isolated bacterium, at least one isolated yeast, ~~a composition of~~ filamentous fungi selected ~~in~~ from the group consisting of ~~the~~ *Pichia*, *Pythium*, *Trichoderma*, *Gliocladium*, *Ampelomyces*, *Talaromyces*, *Epicoccum* ~~genera~~, and an inert vehicle, ~~the~~ each said bacterium ~~or bacteria~~ and ~~the~~ each said yeast ~~or yeasts~~ being non-toxic to the vine, and said bacterium ~~or bacteria~~ is/are is from a genus selected from the group consisting of ~~the~~ *Bacillus*, *Pseudomonas*, *Serratia* and *Streptomyces* ~~genera~~, to treat said disease.
